

# Attestation

On 2 March 2018, Eurofins Product Testing A/S received a sample of panel material with the product name:

## PRINT HPL F1 STR. ABETWOOD

supplied by

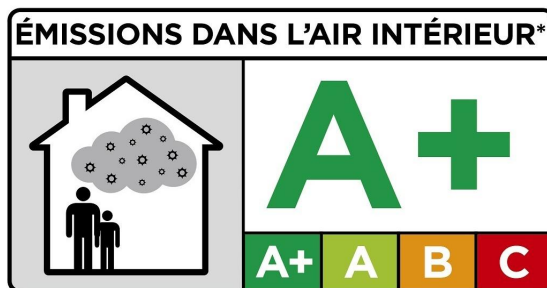

### Abet Laminati S.p.A

*The tested sample PRINT HPL F1 STR. ABETWOOD has been selected by the customer as being representative for the product range of PRINT HPL (< 2mm) for all collections and PRINT HPL (> 2mm) for all collections which according to the information of the manufacturer are based on the overall same chemical composition, but with possible differences in thicknesses. The tested product PRINT HPL F1 STR. ABETWOOD is considered to be the "worst-case"-product regarding VOC emissions.*

The product was tested for VOC emissions according to the requirements of the French legislation (order of April 2011) concerning the labeling of construction products or coverings of walls or floors and paint and varnishes on their emissions of volatiles pollutants.

Sampling, testing and evaluation were performed according to ISO 16000 in its latest versions, see test report no. 392-2018-00092801\_E\_EN\_02.

**In accordance with legislative requirements, the test results can be summarized as follows:**

\*Information sur le niveau d'émission de substances volatiles dans l'air intérieur, présentant un risque de toxicité par inhalation, sur une échelle de classe allant de A+ (très faibles émissions) à C (fortes émissions).

The product was assigned a VOC emission class without taking into account the measurement uncertainty associated with the result. As specified in French Decree no. 2011-321 of March 23, 2011, correct assignment of the VOC emission class is the sole responsibility of the party responsible for distribution of the product in the French market.
